Objective

Cybersecurity-focused Engineer with strong foundations in networking, security operations, and system troubleshooting. Skilled in log analysis, incident investigation, and threat detection, with a strong analytical mindset applied to real-world security scenarios. Seeking an entry-level SOC Analyst role to contribute to security monitoring, incident response, and threat analysis.

Education

Bachelor of Computer Science & Information Technology (IT Track)

EELU – Ain Shams University

Grade: Very Good

Graduation: 2026

Certifications & Courses

-
- **CCNA: Introduction to Networks** – (May 2024), **Switching, Routing & Wireless Essentials** – (Jan2025)
 - **Information Security Analyst** – DEPI (*July 2026*)
 - **IT Specialist: Device Configuration & Management** – Certiport (Sep 2024)
 - **MCSA: Microsoft Certified Solutions Associate**

Skills

Technical Skills:

- **Networking:** TCP/IP, VLANs, DHCP, DNS, Cisco Routing & Switching
- **Security:** Security Monitoring, SIEM & Log Analysis, Incident Detection & Response, Firewalls & ACLs
- **Tools:** Splunk, Wireshark, Nmap, Microsoft Defender, VMware, VirtualBox, Git/GitHub
- **Operating Systems:** Windows, Linux (Ubuntu/Kali)
- **Programming:** Python, SQL
- **Other:** Troubleshooting, API Testing (Postman)

Soft Skills:

- Analytical Thinking and Problem Solving
- Team Collaboration and Communication Skills
- Attention to Detail and Decision-Making Under Pressure

Projects

Security Operations Center (SOC) – RAGMind AI Platform

(Graduation Project – Full-Stack Cybersecurity System)

Designed and implemented a SOC-style security layer for an AI web platform to support real-time threat detection, incident response, and automated mitigation workflows.

Key Contributions:

- Built real-time security monitoring and threat detection for brute-force attacks, suspicious uploads, and abnormal API activity
- Developed a ticket-based incident response workflow covering detection, investigation, mitigation, and resolution
- Implemented automated mitigation actions, including request blocking, user suspension, and attack containment
- Designed a controlled attack simulation environment for security testing and validation
- Implemented secure authentication, RBAC, and centralized audit logging

Work Experience

Part-Time Programming Mentor

Tasabiq – تسابق

Onsite | Jun 2024 – Nov 2024

- Delivered technical instruction and simplified complex concepts into structured, easy-to-understand solutions for students with different learning levels.
- Strengthened analytical thinking, problem-solving, and logical reasoning through interactive programming activities and practical exercises.
- Developed strong communication, presentation, and user-support skills by mentoring students and providing continuous technical guidance and feedback.
- Managed classroom operations, adapted teaching approaches based on student performance, and maintained an engaging and organized learning environment.

Language
